JLichthardt Response to LStorm Comments on Palouse Plants BE.doc

---

<!--[endif]-->

Charissa, Tracy,

Attached is an exchange of comments on the Palouse Prairie Plants Biological Evaluation for the US 95 Thorncreek Road to Moscow project. The Plants BE was prepared by Juanita Lichthardt – you may have a copy with the Draft or Final EISs (let me know if you need it). The attachment above includes Linda Storm’s comments on Juanita’s BE for Plants, and includes Juanita’s responses to Linda’s comments (in red). This version also includes my highlights in green and yellow that may be of interest to you in preparing comments regarding the LEDPA for the Corps Public Notice. If we had a map showing all of the prairie plants, wetland, wet meadow, and plant community wetland indicator occurrences that Linda is recommending, it may support our comments re: the LEDPA. Have a look at this and let me know if you see a need or advantage to having our GIS staff or Landscape Ecologist (Peter L.) assist with a mapping effort to inform/support our LEDPA comments.

Linda, *thank you* for stating your desire to work with us to determine the LEDPA (in the attached comments). Could you possibly join with us in this effort now? The Corps Public Notice information is also attached here. Charissa hopes to have a letter to the Corps prepared by June 9.

Many thanks to you all!

Elaine
